

JAKA MiniCobo Cobot

Weight
8.7kg

Payload
1kg

Working radius
576mm

Repeatability
 $\pm 0.1\text{mm}$

JAKA MiniCobo Cobot has the characteristics of lightness, compactness, high flexibility, and easy installation. It uses an integrated intelligent drive module to achieve a lightweight design while having superior performance; in addition, rich secondary development interfaces provide customers with more choices in different scenarios. JAKA MiniCobo Cobot has a small appearance, simple and intuitive operation, low noise, and high cost performance. It is especially suitable for consumption, service, education and other fields.
